## Strategie e misure di adattamento al cambiamento climatico nella Città Metropolitana di Milano

Updates on the project!

### Heat waves: the areas most at risk in the Milan area

The Metro Adapt project working group has collected temperature data on the hottest nights of the last 4 years. Afterwards, these data have been cross-checked with those on the resident population and the most vulnerable in terms of health. The analysis shows that 24% of the entire metropolitan city of Milan is exposed to the heat island phenomenon, with Corsico, Milan and Sesto San Giovanni as the municipalities most at risk.

## Metro Adapt at the International Conference on Climate Action in Heidelberg!

Meeting point for decision-makers and practitioners from public organisations, business, research and civil society, the conference was the occasion to discuss the latest in terms of energy and climate action. ALDA participated to the workshop Adapting to Change - Enhancing Local Resilience, where it shared with some participant cities Metro Adapt project, together with BEWARE, another project related to climate adaptation of which ALDA is a partner.

## Metro Adapt meets technicians and experts during the Sustainable Development Festival in Milan

Within the Sustainable Development Festival held in Milan last May, Metro Adapt organized the first of the official events dedicated to carrying out work and project activities to municipal administrations and technicians. The event was also open to expert who have been dealing with similar issues for years.

## Metro Theater: the caravan of climate shows has arrived in the municipalities of Milan!

The EU project LIFE Metro Adapt has designed a caravan of theatre shows to explain the risks associated with climate change and communicate the need to regenerate the urban fabric in view of increasingly extreme phenomena. The first show took place last 25 September in Cormano (MI), with the director and playwright Andrea Brunello performing "Pale Blue Dot"

Get inspired!

"It is in public space that the city can try to reconnect with the geography of the place and the soil and find harmony with the climate and with nature". These are the words of Christine Dalnoky, a French landscape architect, which can be explored in the #9 of REBUS®

## What is ALDA?

ALDA – The European Association for Local Democracy - is dedicated to the promotion of good governance and citizen participation at the local level by facilitating the cooperation between local authorities and civil society. ALDA is a membership-based organisation gathering more than 300 members (including local authorities, associations of local authorities, and civil society organisations) coming from over 40 countries. ALDA is funded through membership fees, project funding from the European Commission, the Council of Europe and other public and private donors.

## What is the most noticeable result in terms of sustainability that you witness in your city?

In the city of Vicenza, in the organization's headquarter, we are (leading a participative process aiming at regenerating and rehabilitating the whole area. This project is running thanks to the active role local inhabitants, shopkeepers and organisations in the planning of events and joint actions to foster integration and innovation. This enthusiastic feedback is a clear sign of the existing commitment towards a more equal and sustainable future!

## What is your asset?

Most of ALDA's work is based on the method of multilateral decentralized cooperation. This method involves a multi-stakeholder approach which focuses on strong partnerships between Local Authorities and Non-Governmental Organisations. These partnerships ensure that common goals are successfully reached thanks to complementarities and synergies arising among the different actors and different governance scales.
