## Strategie e misure di adattamento al cambiamento climatico nella Città Metropolitana di Milano

### Updates on the project!

#### Metro Adapt's Pilot Interventions

Pilot interventions will be soon executed in the frame of Metro Adapt. These are small meteoric water management interventions; they are put in place by using Nature Based Solutions as an adaptation tool against increasingly extreme events. The interventions are now in the planning phase and will be carried out by CAP Holding in the coming months. They have evidential value. Technical visits to the construction sites are foreseen.

#### Metro Adapt on Radio Marconi

Extreme weather conditions, increase in city temperature, climate adaptation and urban resilience. We have talked about it within the dossier "The climate has already changed - 2019" presented by the Legambiente Observatory, addressing in particular the emergency in the territory of the Metropolitan City of Milan.

## Metro Adapt at ECOMONDO 2019

CAP Group has participated to Ecomondo 2019, the leading event in Europe for the new models of circular economy held in November in Rimini, Italy. Here, Gruppo CAP presented the Biopiattaforma project. Our colleague Marco Callerio during his speech also illustrated the Life Metro Adapt project.

## The Festa dell'Albero has been celebrated on November 21st: 1500 native trees planted throughout Lombardy

Trees play an important role in protecting us from atmospheric and acoustic pollution, helping to mitigate the effects of climate change and reducing the danger of landslides. However, they constantly suffer the threat of increasing soil consumption, for this reason it is necessary to promote a constant maintenance of the public green and reforestation actions in our cities.

## PALE BLUE DOT: the journey goes on

The events of last weeks remind us that climate change represents an urgency on which it is necessary to reflect and act. Also, why not, through art. That's why after the first performances in Cormano, Parabiago and Paullo, Pale Blue Dot is back on stage! Next events in Milano e Gorzonzola (MI)

### Who is Ambiente Italia?

Ambiente Italia, established in 1995, is one of the main Italian environmental consultancy companies, active for almost thirty years at national and European level. It has proudly completed more than 2,000 projects and assignments for both public and private clients and contributed to about one hundred EU funded projects. Ambiente Italia is part of Ambiente Italia Group that provides technical advice, combined with the services of a certified ESCo and a team of designers and engineers.

### Project we are proud of

Ambiente Italia is a partner of the CLEVER Cities project, which is co-financed by the European Horizon 2020 research program. Together with the Municipality of Milan, CLEVER Cities is developing a campaign for the co-design and construction of innovative green roofs and green walls. Such Nature Based Solutions provide environmental, social and economic benefits to those who make use of and live in the building, with positive effects for the entire surrounding environment.

Overall, CLEVER Cities is aimed at creating the conditions for the development of a local supply chain of designers and installers of green roofs and walls and to technically supports them. Simultaneously, the project strives to identify the necessary tools for bridging the main administrative and economic gaps.

### What is your asset?

Ambiente Italia, thanks to the experience acquired through various European projects (such as BLUEAP, author of the Bologna Municipality Adaptation Plan) has developed an innovative approach to the implementation of resilience and climate adaptation strategies.

A team made of over twenty experts structured around four thematic areas is able to guarantee both an excellent professional experience and a multidisciplinary approach. The latter is based on locally planning experiences, environmental analysis, action planning and analysis of their feasibility.
